

DANIEL ANDREW

BI Developer & Senior Data Analyst

Southport, PR9 • danielbandrew@gmail.com • 07806 720 889

Professional Summary

BI Developer and Senior Data Analyst with 18 years' experience delivering end-to-end cloud data solutions, automated ETL pipelines, and thought invoking Power BI reporting across Utilities, Telecommunications, Financial Services, Energy and Charity sectors. Track record of turning ambiguous business problems into quantified findings from root-cause analysis, regulator-facing FCA conduct-risk reporting adopted across three business areas, to designing agent level dashboards with row level personalisation. Skilled in Azure Synapse, SQL, DAX, Excel and Power Query, with a proven ability to translate large scale enterprise datasets into resilient, self-service reporting frameworks and to manage technical and non-technical stakeholders through to delivery.

Employment History

BI Developer — Electricity North West (ENWL)

2025 – Present

- Design and build modern ETL pipelines and data models using Azure Synapse and SQL, supporting network operational resilience for 5M+ customer accounts.
- Develop interactive Power BI dashboards used directly in companywide decision making, including storm and outage-response reporting tracking offline customers and restoration progress in real time.
- Lead analytical reviews of business processes and source systems to automate manual reporting workflows and optimise pipeline performance.
- Establish unit testing, release control and technical documentation standards to ensure robust production deployments aligned to data governance policy.
- Partner with technical peers, third-party suppliers and business sponsors to manage backlog delivery across the enterprise analytics roadmap.

Senior Business Intelligence & Data Analyst — Capita, Southport

2023 – 2025

- Led requirements gathering sessions with senior stakeholders to scope and align BI delivery, including an FCA conduct-risk reporting suite adopted across three regulated business areas.
- Applied Six Sigma methodology to track operational KPIs and identify process bottlenecks, including a root-cause investigation that explained a 62% year-on-year rise in customer goodwill spend and directly informed process and training fixes end to end.
- Built an agent-level performance dashboard with DAX driven personalised security, giving individual agents visibility of their own metrics against anonymised peer benchmarks.
- Cleaned and modelled complex, multi-source datasets using Power Query, SQL and DAX to deliver interactive Power BI dashboards for executive stakeholders.
- Automated reporting workflows with Power Automate, reducing manual turnaround time and freeing analyst capacity for higher-value work.

Business Insight Analyst — Capita, Preston

2018 – 2023

- Analysed large-scale operational data using SQL, Excel and Power BI, translating raw multi-source extracts into actionable insight for business leaders.
- Delivered a customer-survey-to-telephony data integration (92% match accuracy) feeding an NPS dashboard with built-in forecasting and regression analysis, which identified agent knowledge not survey volume as the real driver of customer satisfaction.
- Delivered cost-reduction initiatives yielding savings ranging from £1k to £1,000,000 across multiple business streams.
- Facilitated weekly and monthly KPI performance reviews with senior stakeholders to track progress and drive measurable improvement.

Team Manager — Capita, Preston

2012 – 2018

- Led and mentored a team of 22, maintaining top-performing team status for 15 consecutive months.
- Automated core administrative tasks, including 1-to-1 tracking and performance documentation, freeing up capacity for direct coaching.

Core Skills

Cloud & Data Architecture: Azure Data Factory (ADF), Azure Synapse, Data Lakehouse, ETL Pipelines, Data Modelling

Analytics & Visualisation: Power BI, Advanced DAX, Power Query, Data Visualisation, Excel, Tableau

Data Engineering & Languages: SQL, T-SQL, Python, Data Warehousing, Data Governance, SAP Integration

Process & Delivery: Six Sigma (White & Yellow Belt), Stakeholder Management, Root-Cause Analysis, Regulatory Reporting

Certifications & Education

Microsoft Certifications: PL-300 (Power BI Data Analyst Associate), Azure Data Fundamentals (DP-900) (In Progress), Azure AI Fundamentals (AI-900), DP-600 (In Progress)

Education: BSc Data Science (Coursework); Preston College - Electrical Servicing (Distinction).
